"THE SUPREME FRUIT OF SELF-SUFFICIENCY IS FREEDOM."

EPICURO

JUPITER mobile stander for children is designed to merge important **rehabilitation therapy of verticalization** with the practice of the **autonomous movement**.

Autonomous **propulsion** helps to develop **locomotor skills** of the upper limbs and encourages development of **cognitive, visuospatial functions** and awareness of the surrounding space.

Gaining new skills and competences **increases self-esteem** and contributes to find a proper expression of personal creativity, creating quality social interactions.

AUTONOMY REPRESENTS AN IMPORTANT STEP  
TOWARDS INDEPENDENCE.

# TO STAND **AND** TO MOOVE

**two important concepts**  
combined in **one device**  
with **numerous benefits**

- ✓ **TRAY**  
for introduction of numerous  
manual activities
- ✓ **24" OR 32" MAIN WHEEL**  
two big main wheels for  
autonomous propulsion
- ✓ **CHEST SUPPORT**  
combined with positioning belt to  
secure upright position
- ✓ **KNEE SUPPORTS**  
adjustable in many directions for  
better leg comfort
- ✓ **SWIVEL CASTERS**  
with individual parking brakes  
to secure stationary position
